Neptun's new 1:1250 2344 NEWPORT NEWS (CA-148), U.S. CA 1967

## MEMO FROM PETE PASCHALL

Well, here we go into our 46th year. Where did the time go? We had planned to get a Report out toward the last part of 2010 but a combination of adverse circumstances foiled that plan...illness, equipment breakdowns, the sudden retirement of our web person and even one of our number taking time off to engage in the great game of politics! However, we did manage to fill your orders as best we could and am happy to say we are back to normal now (Well, almost!).

In regard to Superior, we are building back our stocks as you can see from the restock list below. We have some re-issues of some Wayne Smith's "Never-weres". Wayne is busy with an exciting new ship project which will be announced next issue. By the way, please note that we have embedded the Figurehead ships in with the Superior listings. Clydeside is showing signs of life and we hope to have a fresh listing in our next issue. Keep your eye on our website for the latest. Note also that if you're into 1:1200 kits, Alnavco offers you Superior, Clydeside, Figurehead and Mountford, the largest selection available anywhere.

Navis-Neptun has some interesting new models out emphasizing post WWII ships. GHQ keeps issuing new 1:2400's. We carry a great selection of 1:2400's which include SeaBattle (which make a lot of WWII ships, especially auxiliaries that GHQ does not) and Superior.

Chuck Treese has sent us a series of letters on his adventures with the recently released Superior WASP (A515). He gives tips on how to convert it to other ESSEX class carriers. Very interesting stuff and you can find them posted on our website. Other website issues: Our automatic email response to your web orders is currently down. We are working to get it up and going again.

So take a look at what we have for you this issue and let us know what your selections are. And as always, from the two Pete's and Sue, we thank you for your orders!

## SUPERIOR 1:1200 "NEVER-WERE" REISSUES

- |      |         |  |
|------|---------|--|
| J114 | \$32.50 | <b>FUJIMOTO</b> , Japanese BB design, circa 1929<br>35,000T, 761'L, 9-16", 12-6" |
| J115 | \$32.50 | <b>HIRAGA</b> , Japanese BB design circa 1929<br>35,000T, 761'L, 10-16", 16-6"   |

Both of these designs were named after their famous Japanese designers. They were designed to meet the 35,000T Treaty limit and to maintain 26K to keep up with KONGO and NAGATO. TOSA size hulls were chosen but this meant that weight had to be pared down which would have limited their armor. The Superior models are predicated on these designs which had a beauty and symmetry that characterized Japanese battleships and cruisers. For more background information on these ships and a list of other IJN ships that these two naval architects designed, go to our website, click Modeling & Historical Notes, then click "Special Editions."

- |      |         |  |
|------|---------|--|
| G103 | \$32.50 | <b>H39</b> , German BB<br>52,600T, 873'L, 12-15", 12-5.9",<br>16-4.1", 30.4K |
|------|---------|--|

Successor to the BISMARCK, the design of this class of ships formed the backbone of the "Z" plan. They were intended for long ocean deployments and convoy destruction. Two were laid down but never completed.

- |      |         |   |
|------|---------|---|
| G104 | \$32.50 | <b>H39</b> , G103 with 8-16" guns   |
| G105 | \$57.50 | <b>H44</b> , German BB<br>128,930T, 1133'L, 8-20" (4x2),<br>12-5.9" (4x3), 8-4.1", 8-21TT |

The ultimate in BB design and the biggest ever contemplated, this ship could have absorbed impressive amounts of ordnance before inevitably being sunk by Allied aircraft.

- |      |         |  |
|------|---------|--|
| J202 | \$27.50 | <b>B-65 (Project 795)</b> , Japanese CB<br>31,500T, 808'L, 9-12", 8-3.9",<br>8-24"TT |
|------|---------|--|

This design grew out of the so-called "Battlecruiser Gap" of the late 1930's and was the answer to the U.S. ALASKA class. More urgent work occupied the Japanese planning staff as they geared up for WWII, and work on the planned six ships was never started.

## OTHER SUPERIOR "NEVER-WERE" REISSUES

The following ships from "The Fleet that never-was" are now in stock in very limited quantities. Get 'em while you can as it could be several years before they are reissued again.

- |      |         |                                   |
|------|---------|-----------------------------------|
| B102 | \$29.50 | <b>LION</b> , British BB          |
| G207 | \$27.50 | <b>KREUZER P</b> , German CB 1939 |
| J108 | \$33.95 | <b>TOSA</b> , Japanese BB 1921    |
| J201 | \$27.50 | <b>AMAGI</b> , Japanese CB 1922   |

## SUPERIOR 1:1200 UPGRADES

The following were announced earlier this year

- |      |         |  |
|------|---------|--|
| A510 | \$34.50 | <b>MIDWAY (CVB-41)</b> , U.S. CV<br>(Straight Deck) 1945 |
| A515 | \$34.50 | <b>WASP (CVA-18)</b> , U.S. CV<br>(Angled Deck) 1960's   |

Announced last issue: German "Heavies" are back after a looong time in the yards and have been upgraded by Wayne Smith.

SMYF1	\$ 7.50	P2Y3 Patrol Plane, circa 1938 <b>Note:</b> This aircraft was manufactured by Consolidated Aircraft and the model appears as it did in VP-4 squadron. Personal note: It was flown in 1937 as part of VP-5F by Admiral "Jimmie" Thach who later commanded the Hornet F4F's at the Battle of Midway and was the inventor of the "Thach Weave." Your editor was privileged to be on his staff in the 1950's when as a RADM, he was ComCarDiv16 and ComHukForLant aboard the USS VALLEY FORGE (CVS-45).

For a biography of the Admiral, Google Thach Weave; The Life story of Jimmie Thach. Especially interesting is his roll in developing tactics to overcome the advantages that the Japanese Zero had over the F4F Wildcat.

### PASS IN REVIEW

A review of recent releases and other items of interest...

#### South Salem 1:1200 Recognition Models

South Salem was a small producer of waterline ship models prior to WWII. During WWII they were awarded a contract by the Navy to produce a series of 1:1200 recognition models of merchant ships. Wayne Smith has obtained a number of these and has upgraded them. The following collector gems from this series are now available.

M103	\$18.95	Passenger Ship, old 5"L (SS03)
M106	\$ 8.95	Standard Freighter 2.8"L (SS06)
M107	\$16.95	Modern Freighter 4.5"L(SS07)
M114	\$19.50	Collier, 6"L (SS14)
M115	\$ 5.95	Trawler, 1.5"L (SS15)

#### Navis/Neptun 1:1250

1103C	\$ 65.00	<b>RESOLUTION</b> , British BB 1943
1108	\$101.50	<b>ST. ANDREWS (N3)</b> , British "Never-was" CB 1921

**Note:** The class was cancelled at the time of the Washington Treaty. There were to be three others in the class, ST. DAVID, ST. GEORGE and ST. PATRICK.

1034B	\$63.50	<b>ADMIRAL SCHEER</b> 1944
1308A	\$67.00	<b>NEW YORK (BB-34)</b> , U.S. BB, 1944
1342C	\$68.50	<b>SAVANNAH (CL-42)</b> , U.S. WWII CL <b>Note:</b> This is a computer generated model by Darius of Pa-perlab. It is scheduled for release at the end of the summer.

1396	\$69.50	<b>CURRITUCK (AV-7)</b> , U.S. Seaplane Tender 1943
1396A	\$76.50	<b>TANGIER (AV-8)</b> , U.S. AV 1941 <b>Note:</b> Present at Pearl Harbor just abaft of BB UTAH.

234N	\$49.50	<b>TOKIWA</b> , Japanese Cruiser 1898
------	---------	---------------------------------------

#### Saratoga Model Shipyard 1:1250

SMY42	\$69.50	<b>CURTISS (AV-4)</b> , U.S. Seaplane Tender 1943 <b>Note:</b> Damaged at Pearl Harbor; Sister: ALBEMARLE (AV-5); Another great job by Paul Jacobs; Model is painted in Measure 21. <b>Note:</b> Computer-generated model by Darius that Neptun announced earlier

### Mountford 1:1250 Harbor Structures

This is a very nice series of harbor structures that can be set by themselves or combined for harbor dioramas. Individual pieces make good backgrounds for "bookshelf" displays. Completely painted, made of resin, come with small cranes, 12" long

MM188P \$19.50	Dockside Refinery
MM189P \$19.50	Provisioning Dock
MM190P \$19.50	Repair Jetty (Space for 2-3" ships)
MM191P \$26.50	Dry Dock, w/buildings, space for a 3" model
MM201P \$ 7.95	240 Ton Crane
MM204P \$ 9.95	240 Ton Crane (new lattice work casting)

**Note:** All of the above come with a small seabase which can be attached separately.

### PASS IN REVIEW; FIGUREHEAD 1:1200

Following is a current availability list of this fine line of 1:1200 kits. Great fit with Superior and Clydeside kits; Note: The Figurehead line can be found on our website embedded in the Superior 1:1200 listings
