Neptun has issued several new “Spider Navy” releases and you can see from the photos in this issue that they are the ultimate in miniature ship models. Obviously price but what additions to your collections they would make! Production on models in this series is limited as they are all hand made by the skilled craftsmen at Neptun and each take a lot of time to build. If you see a model in this series you want, by all means order it. It may take some time to get it to you but it will be arriving in your harbor eventually. As always, patience is the watchword in this hobby!

This is also the case for Superior. With so many models available, we just can’t produce all of them all the time. However, we will keep you informed as models are restocked (See current list in this issue but be informed that this is not a complete list of models in stock.), But do order the models you want and as stated above, we’ll get ’em to you sooner or later.

Oh and be sure to check out the new 1:1250 releases from Argos, Saratoga and Mountford in this issue.

The star performer in this hobby continues to be GHQ and thus each take a lot of time to build. If you see a model in this series you want, by all means order it. It may take some time to get it to you but it will be arriving in your harbor eventually. As always, patience is the watchword in this hobby!

Superior 1:1200 “Never-were” reissues...

Back on the mythical high seas are the following ships that never made it off the drawing boards of the naval architects who designed them. They will be in port only for a short time before disappearing over the horizon for a few years so order them soon.

**Superior 1:1200**
